Met Office Aberdeen Meteorologist's View
Valley temperatures near plus 1 or 2 Celsius at dawn. Unseasonably cold at height.

Forecast for Sunday 23 May 2021
Weather: Dry with clear spells through the early hours. Then a dry, bright start but cloud increasing through the morning with rain spreading northeast soon after midday, the rain heavy for a time and preceded briefly, above about 900m, by snow. Some late sunny then clear spells developing for the evening with a few showers.

Maximum wind: Southerly or southwesterly around 10-15mph backing southeasterly 20-25mph, gusts around 40mph over higher ridges and summits, by midday. Winds turn more southerly again later and ease.

Chance of cloud free mountain/hill tops above 800m: Around 75% at first falling close to zero by early afternoon. Chances rise again during the evening.

Visibility: Occasional cloud above 600m at first and again in evening, gradually becoming periods above about 450-600m through the late morning and for much of the afternoon. Away from cloud, very good or excellent falling to just a few kilometres in heavier rain and perhaps a kilometre or less in any snow.

Temperature: **Glens:** Around plus 1 or 2 Celsius at dawn rising to plus 11 Celsius by day
At 800m: Around plus 4 Celsius
Freezing level: 600m rising above summits later
